

SCIROCCO - Scaling Integrated Care in Context

Dr Andrea Pavlickova
European Service Development Manager, NHS 24

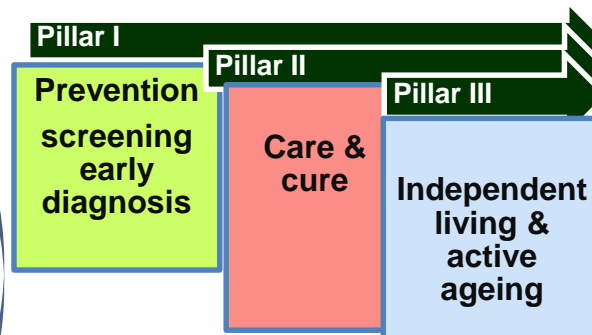

ICIC 2016
23 May 2016, Barcelona

SCIROCCO builds on the achievements of the European Innovation Partnership on Active and Healthy Ageing

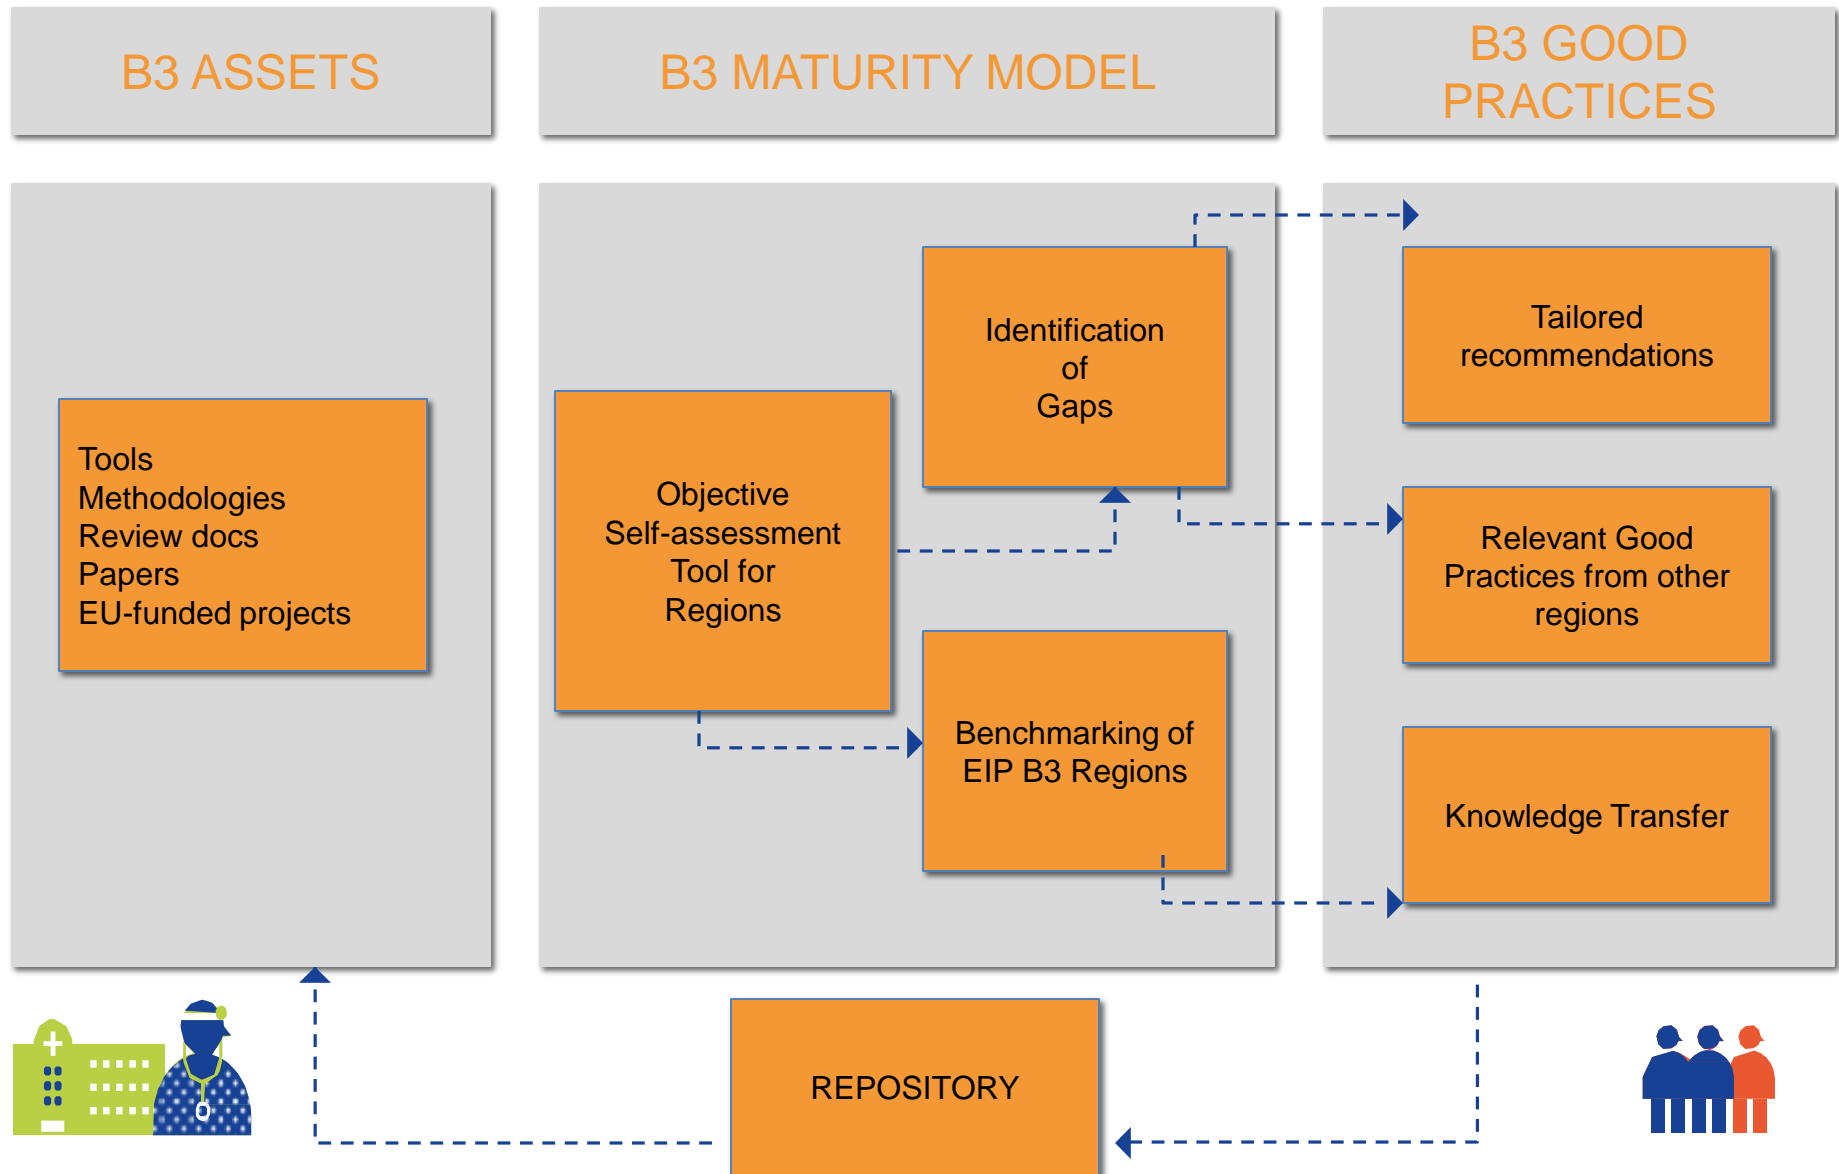

crosscutting, connecting & engaging stakeholders across sectors, from private & public sector
Specific Actions

+2 HLY by 2020
Triple win for Europe

Framework for B3 Integrated Care Toolkit

EIPonAHA Repository

EUROPEAN INNOVATION PARTNERSHIP ON ACTIVE AND HEALTHY AGEING

THE REPOSITORY OF INNOVATIVE PRACTICES IS NOW LIVE!

The Repository will help to mobilise and gather resources and knowledge on **Active and Healthy Ageing** to deploy scalable, innovation-driven and digitally-enabled solutions.

WHAT TO SCALE UP

- 1 Proven Innovative Practices (IPs)
- 2 Viability of IPs
- 3 Classification of IPs

REPOSITORY OF INNOVATIVE PRACTICES

HOW TO SCALE UP

- 4 Facilitating partnerships
- 5 Implementation - key success factors and lessons learnt

The Repository of Innovative Practices is the basis for the **European AHA** scaling up strategy.

ec.europa.eu/eip/ageing/repository_en
#scaleupAHA

Challenges of Scaling-up

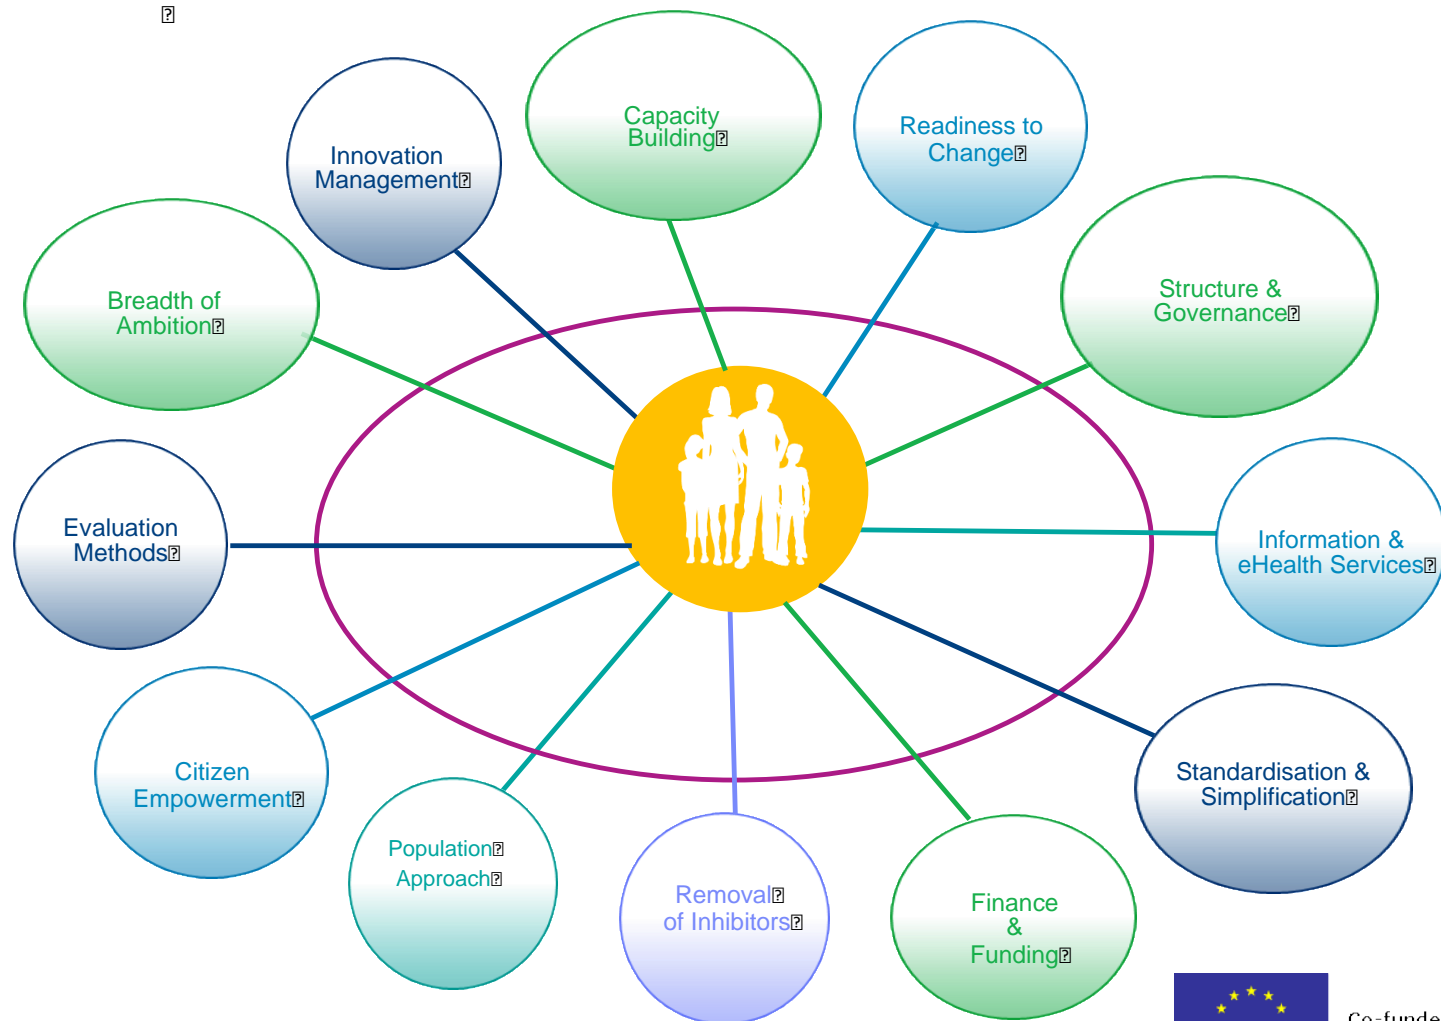

- Systematic use of different types of **evidence**;
- Understanding the **context** of scaling-up – features of the intervention need to “fit” into the context appropriately;
- Identification of **transferable elements** of good practice/intervention for scaling-up;
- **Flow of appropriate information** between adopting and transferring entities

Framework models/tools for scaling up are needed

The EIPonAHA B3 Maturity Model (B3-MM)

Co-funded by
the Health Programme
of the European Union

The EIPonAHA B3 Maturity Model (B3-MM)

- The main goal of the B3-MM is to provide **multi-dimensional benchmark** of the maturity of a context in which a good practice operates or is proposed to transfer into. It will help regions to identify:
 - The context requirements of a good practice that is considered for adoption;
 - The level of maturity required for the health and social care system to adopt a particular practice;
 - The actions that more progressive regions have taken in order to be successful;
 - Lessons learned from these pioneers to overcome barriers and accelerate results;
 - The process of information sharing on lessons learned to help other aspiring regions to speed up their own adoption.

However,

TESTING & VALIDATION IS NEEDED

SCIROCCO

Co-funded by
the Health Programme
of the European Union

SCIROCCO's Objective

“To facilitate the scaling-up of good practices at local, regional or country level by recognising the maturity requirements of good practices and health systems in order to achieve scaling-up and knowledge transfer among European Member States”

Co-funded by
the Health Programme
of the European Union

SCIROCCO Objectives

1. To improve the evaluation and benchmark of good practices in order to filter and identify potentially adoptable good practices for health and care systems;
2. To assess the health and care delivery system of a region in terms of its maturity to adopt good practice in the provision of integrated care;
3. To facilitate the process of information sharing between regions to share lessons learned, thereby speeding up adoption and scaling up;
4. To provide a refined and tested tool that identifies, analyses and facilitates knowledge transfer of the multidimensional maturity requirements of good practices and health and care systems.

The Outcomes

❑ **B3-MM to become a key tool in facilitating exchange of good practices and scaling – up processes in Europe**

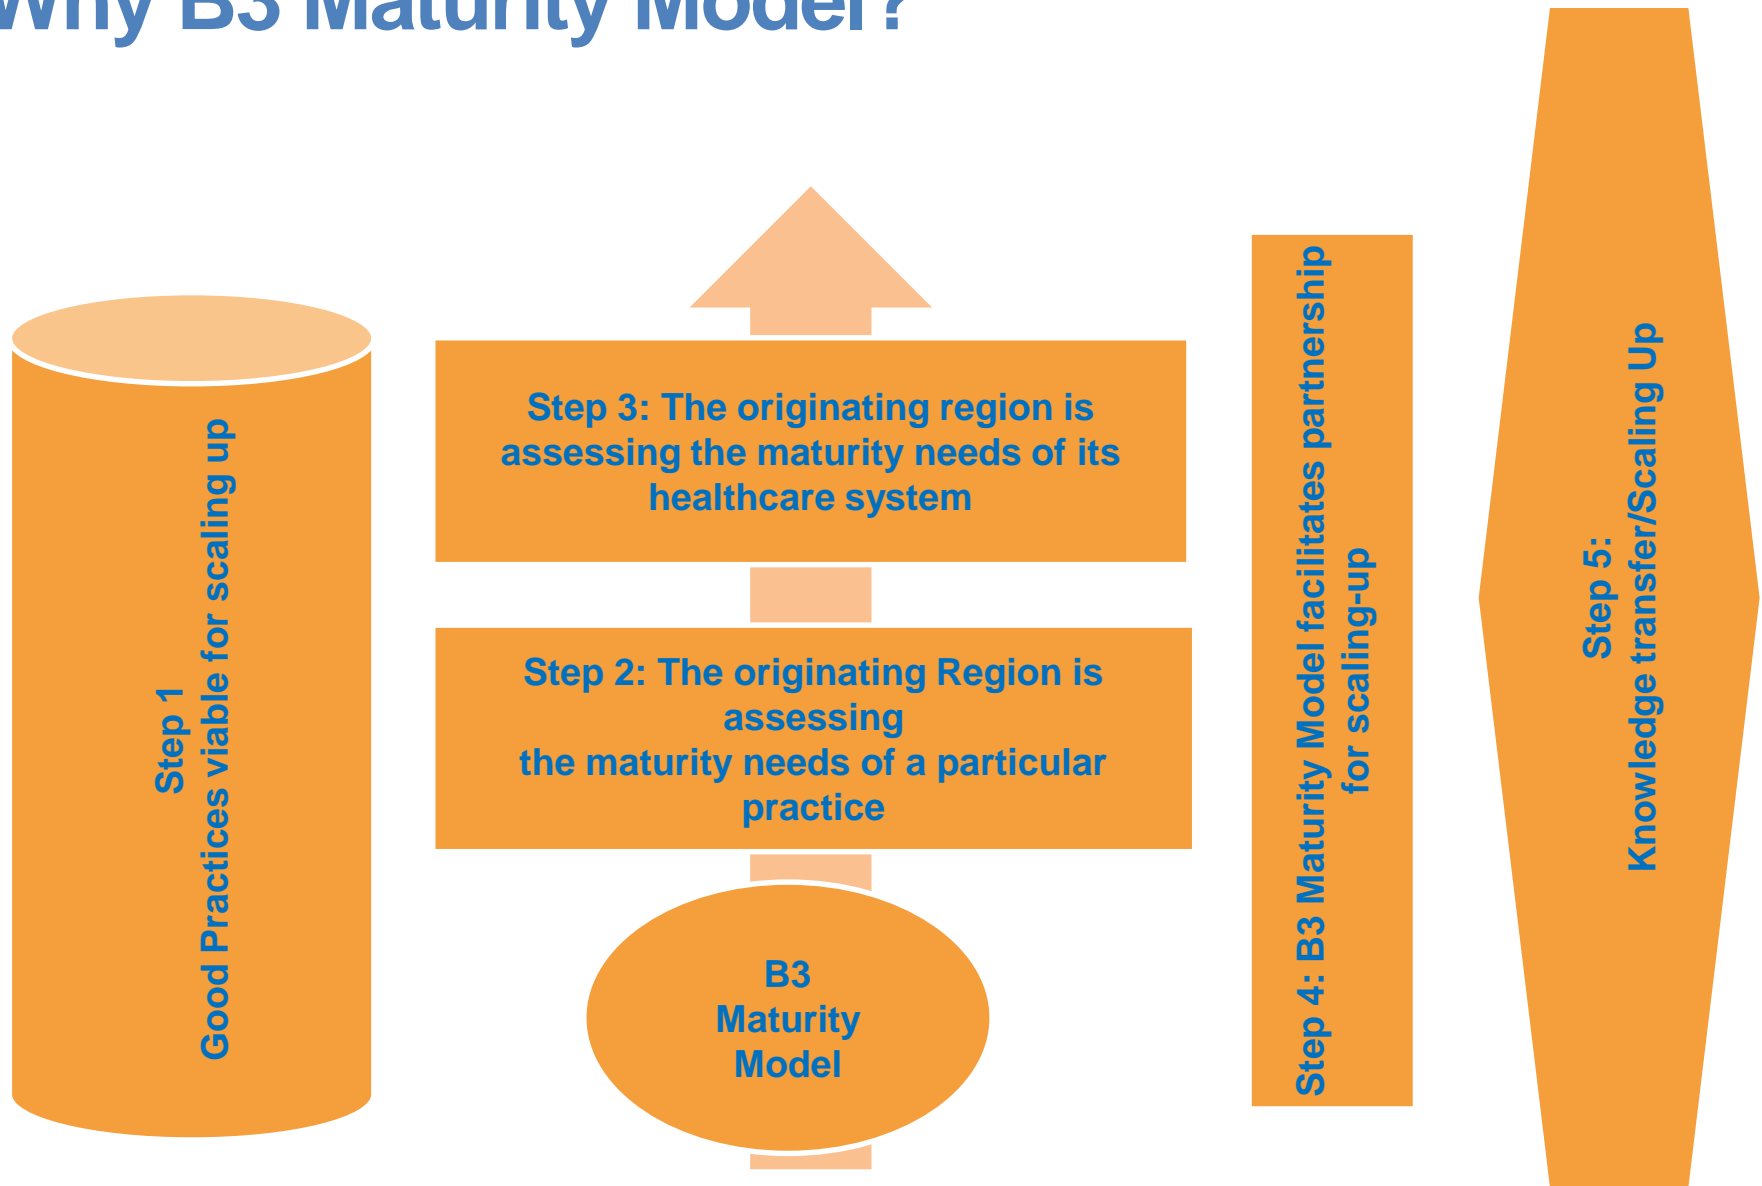

❑ **Key aspects**

- Improved access to learning embedded in good practices;
- Improved capacity of regions for adoption of good practices;
- Faster adoption and scaling-up of good practices in the provision of integrated care;
- Increased use of the B3-MM in the process of scaling-up;
- Improved informed decision-making on European, national and local level.
