SCIROCCO - Scaling Integrated Care in Context

Dr Andrea Pavlickova
European Service Development Manager, NHS 24

ICIC 2016
23 May 2016, Barcelona
SCIROCCO builds on the achievements of the European Innovation Partnership on Active and Healthy Ageing

crosscutting, connecting & engaging stakeholders across sectors, from private & public sector

Specific Actions

- Improving prescriptions and adherence to treatment
- Better management of health: preventing falls
- Preventing functional decline & frailty
- Integrated care for chronic conditions, including telecare
- ICT solutions for independent living & active ageing
- Age-friendly cities and environments

+2 HLY by 2020

Triple win for Europe
Framework for B3 Integrated Care Toolkit

**B3 ASSETS**
- Tools
- Methodologies
- Review docs
- Papers
- EU-funded projects

**B3 MATURITY MODEL**
- Objective Self-assessment Tool for Regions
- Identification of Gaps
- Benchmarking of EIP B3 Regions

**B3 GOOD PRACTICES**
- Tailored recommendations
- Relevant Good Practices from other regions
- Knowledge Transfer

**REPOSITORY**
EIPonAHA Repository

EUROPEAN INNOVATION PARTNERSHIP ON ACTIVE AND HEALTHY AGEING

THE REPOSITORY OF INNOVATIVE PRACTICES IS NOW LIVE!

The Repository will help to mobilise and gather resources and knowledge on Active and Healthy Ageing to deploy scalable, innovation-driven and digitally-enabled solutions.

WHAT TO SCALE UP

1. Proven Innovative Practices (IPs)
2. Viability of IPs
3. Classification of IPs

HOW TO SCALE UP

4. Facilitating partnerships
5. Implementation - key success factors and lessons learnt

The Repository of Innovative Practices is the basis for the European AHA scaling up strategy.

ec.europa.eu/eip/ageing/repository_en
#scaleupAHA
Challenges of Scaling-up

- Systematic use of different types of evidence;
- Understanding the context of scaling-up – features of the intervention need to “fit” into the context appropriately;
- Identification of transferable elements of good practice/intervention for scaling-up;
- Flow of appropriate information between adopting and transferring entities

Framework models/tools for scaling up are needed
The EIPonAHA B3 Maturity Model (B3-MM)

- The main goal of the B3-MM is to provide multi-dimensional benchmark of the maturity of a context in which a good practice operates or is proposed to transfer into. It will help regions to identify:

  - The context requirements of a good practice that is considered for adoption;
  - The level of maturity required for the health and social care system to adopt a particular practice;
  - The actions that more progressive regions have taken in order to be successful;
  - Lessons learned from these pioneers to overcome barriers and accelerate results;
  - The process of information sharing on lessons learned to help other aspiring regions to speed up their own adoption.
However, testing & validation is needed. 

SCIROCCO
SCIROCCO’s Objective

“To facilitate the scaling-up of good practices at local, regional or country level by recognising the maturity requirements of good practices and health systems in order to achieve scaling-up and knowledge transfer among European Member States”
SCIROCCO Objectives

1. To improve the evaluation and benchmark of good practices in order to filter and identify potentially adoptable good practices for health and care systems;

2. To assess the health and care delivery system of a region in terms of its maturity to adopt good practice in the provision of integrated care;

3. To facilitate the process of information sharing between regions to share lessons learned, thereby speeding up adoption and scaling up;

4. To provide a refined and tested tool that identifies, analyses and facilitates knowledge transfer of the multidimensional maturity requirements of good practices and health and care systems.
The Outcomes

- B3-MM to become a key tool in facilitating exchange of good practices and scaling – up processes in Europe

Key aspects

- Improved access to learning embedded in good practices;
- Improved capacity of regions for adoption of good practices;
- Faster adoption and scaling-up of good practices in the provision of integrated care;
- Increased use of the B3-MM in the process of scaling-up;
- Improved informed decision-making on European, national and local level.
Why B3 Maturity Model?

Step 1: Good Practices viable for scaling up

Step 2: The originating Region is assessing the maturity needs of a particular practice

Step 3: The originating region is assessing the maturity needs of its healthcare system

Step 4: B3 Maturity Model facilitates partnership for scaling-up

Step 5: Knowledge transfer/Scaling Up
SCIROCCO’s contribution to the European Scaling Up Strategy

What to scale up:
1. Proven Good Practices (GPs)
2. Viability of GPs
3. Classification of GPs for replication locally

How to scale up:
4. Facilitating partnerships
5. Implementation – key success factors and lessons learnt

European Scaling up Strategy

Database of good innovative practices

SCIROCCO Step 1
SCIROCCO Step 2
SCIROCCO Step 3

SCIROCCO Step 4
SCIROCCO Step 5

B3 Maturity Model
SCIROCCO’s Strategy to Implement the Project

**Step 1: Dephi study**

Outcomes of step 1: Validated B3-MM

**Step 2: Maturity assessment**

Outcomes of step 2: B3-MM used to identify maturity requirements in the selected good practices

**Step 3: Refinement of B3-MM**

Outcomes of step 3: B3-MM validated as multidimensional benchmark of good practices

**Step 4: Self-assessment of European regions**

Outcomes of step 4: Maturity of regions for adoption of selected good practices

**Step 5: Further Refinement of B3-MM**

Outcomes of step 5: B3-MM tested in real life settings as a self-assessment tool

**Step 6: Knowledge transfer**

Outcomes of step 6: B3-MM tested in the process of twinning and coaching to facilitate scaling-up

**Step 7: Analysis of experience of scaling-up**

Outcomes of step 7: Lessons learned and policy recommendation

**Step 8: Final SCIROCCO tool**

Outcomes of step 8: Final SCIROCCO tool developed.
