INTRODUCTION TO THE PROJECT

Marc Lange, EHTEL

Co-funded by
the Health Programme
of the European Union

@ SCIROCCO_EU

The project

- ► Funding from EU Health Programme
  - ■ Budget: €2,204,631.21
- ► Start of the project: 1 April 2016
  - ■ Duration of the project: 32 Months
- ► Project Co-ordinator: NHS 24, Scotland
  - ■ 10 Partners: (UEDIN, VUB, UVEG, Kronikgune, Osakidetza, ARES Puglia, FNOL, NLL, EHTEL)
  - ■ 5 Healthcare regions & EIP on AHA Reference Sites: Basque Country, Norrbotten, Olomouc, Puglia, Scotland

SCIROCCO builds on the achievements of the European Innovation Partnership on Active and Healthy Ageing

crosscutting, connecting & engaging stakeholders across sectors, from private & public sector

Specific Actions

+2 HLY by 2020
Triple win for Europe

- health & quality of life of European citizens
- sustainable & efficient care systems
- growth & expansion of EU industry

Pillar I
Prevention screening early diagnosis

Pillar II
Care & cure

Pillar III
Independent living & active ageing

Improving prescriptions and adherence to treatment

Better management of health: preventing falls

Preventing functional decline & frailty

Integrated care for chronic conditions, including telehealth

ICT solutions for independent living & active ageing

Age-friendly cities and environments

Scirocco
Scaling Integrated Care in Context

Why SCIROCCO?

► Challenges of transposing/scaling up a good practice:

- Understanding the **context** of scaling-up
  i.e. the features of the intervention need to "fit" into the context appropriately;
- Identification of **transferable elements** of good practice/intervention for scaling-up;
- **Flow of appropriate information** between adopting and transferring entities
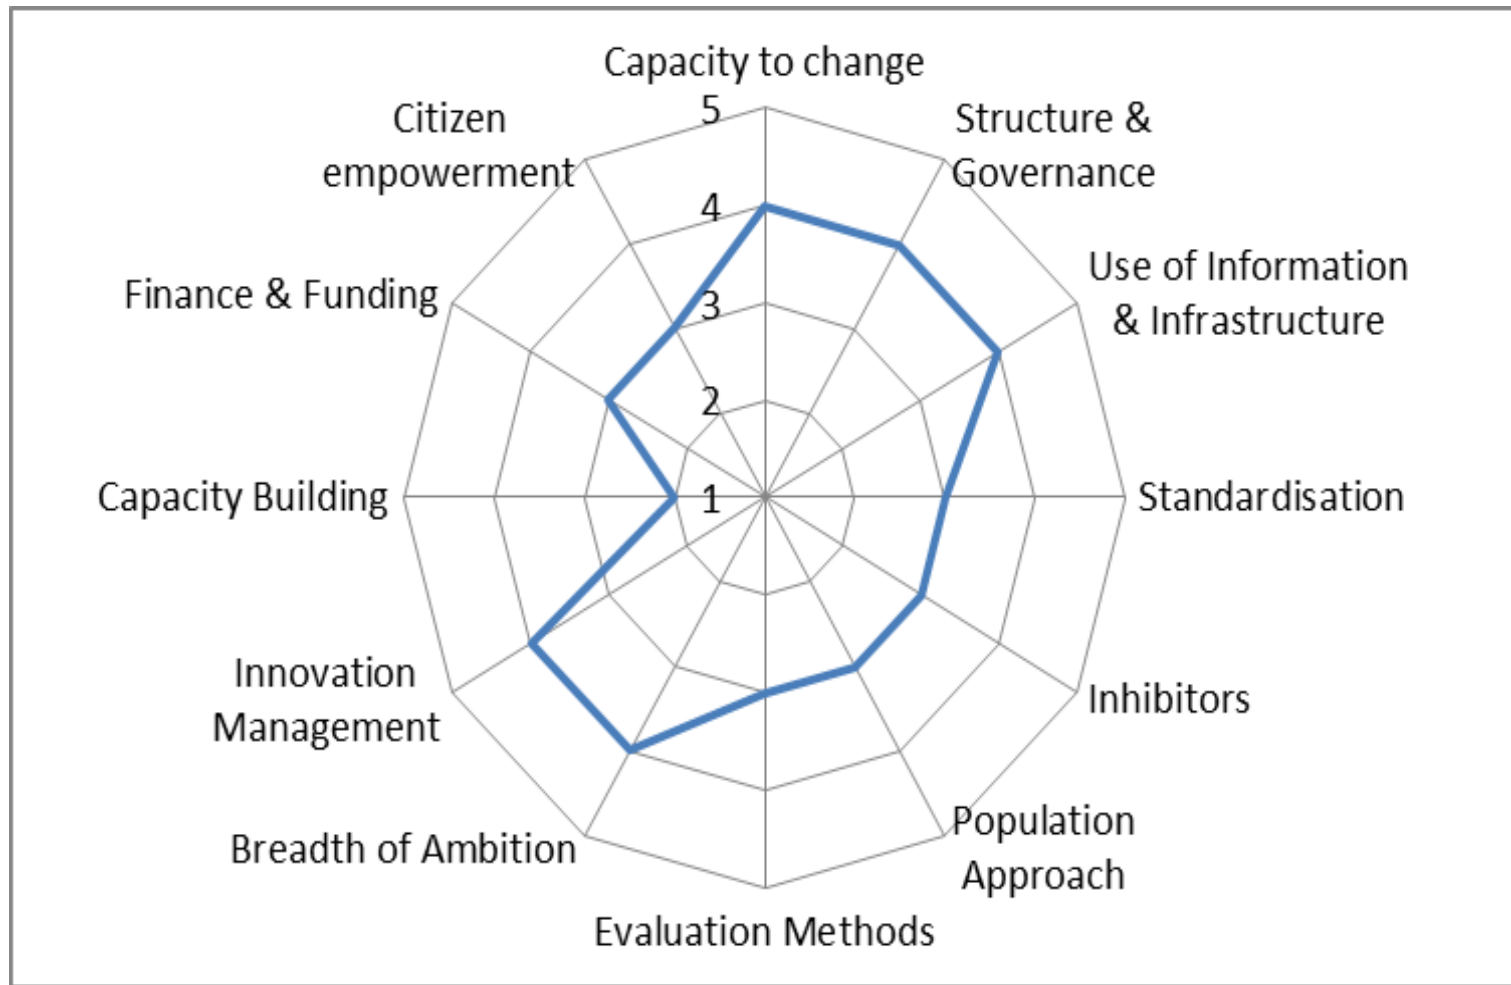

Framework models/tools for scaling up are needed

The B3 Maturity (Conceptual) Model…
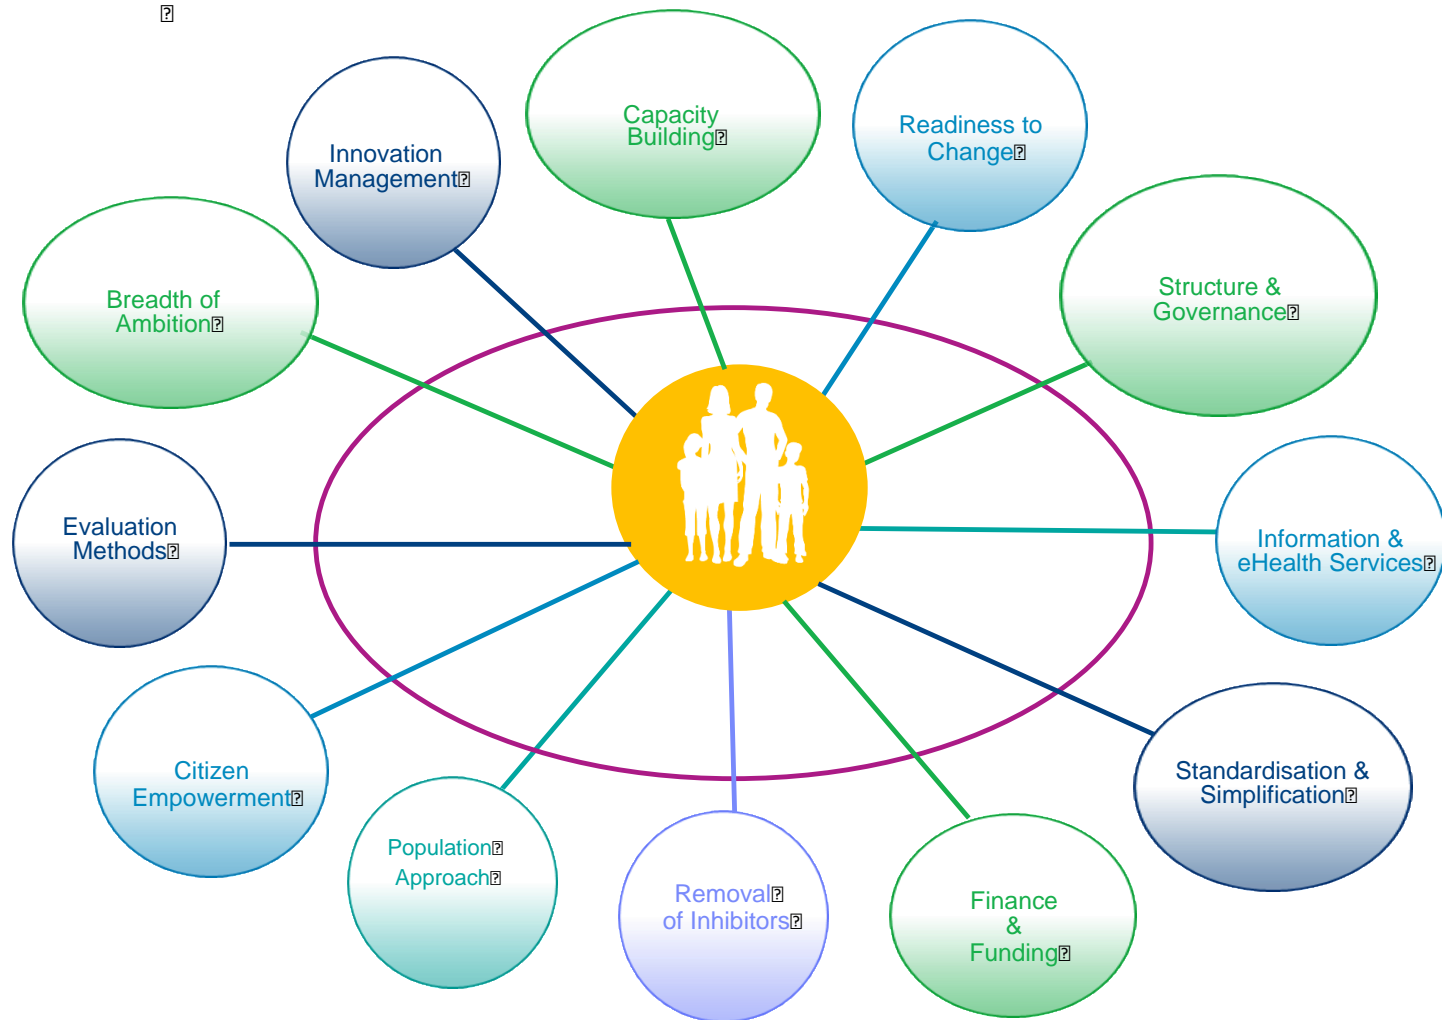

Applying the B3 Maturity Model:
First Experiences, e.g. with Scotland

Towards an Online Self-Assessment Tool for Integrated Care

SCIROCCO
Scaling Integrated Care in Context

Information & eHealth Services

► **Sharing health information and care plans across care teams and empowering citizens**

► **Maturity indicators**

   ■ Regional/national longitudinal electronic health record;

   ■ At scale teleservices

   ■ Ability to combine health and social care information

   ■ Care collaboration platforms

   ■ …

Information & eHealth Services

► **Maturity Assessment:**

0 – **Not designed** to support integrated care

1 – Being **piloted** to support integrated care

2 – **Deployed** to support integrated care but there is **not yet region-wide** coverage

3 – **Available** to support integrated care via a **region-wide** service but use of these services is not yet mandated

4 – **Mandated** or funded use of regional/national eHealth infrastructure across the healthcare system

5 – **Universal**, at-scale regional/national eHealth infrastructure used by all integrated care stakeholders.

SCIROCCO's objectives

► To **recognise the maturity requirements** of good practices and health systems

► in order to facilitate **scaling-up / knowledge transfer** among European Member States

How?

► Identifying adoptable good practices by **improving evaluation and benchmark methods**

► By **assessing the maturity of a health and care system** to adopt a particular good practice

► By providing a **tool that identifies, analyses and facilitates knowledge transfer** of the multidimensional maturity requirements of good practices and health and care systems

► By **facilitating the process of information sharing** between regions to speed up adoption and scaling up of a good practice

A stepwise development process

On- going evaluation of the process of knowledge transfer

Step 8
Final
SCIROCCO tool

Scaling-up

Step 7
Analysis of
experience of
scaling-up

Outcomes of step 7:
Lessons learned and
policy recommendation

Regions preparing the
environment for scaling-
up

Step 6
Knowledge
transfer

Outcomes of step 6: B3-MM tested in
the process of twining and coaching
to facilitate scaling-up

Step 5
Further
Refinement of B3
- MM

Outcomes of step 5: B3-MM tested in real
life settings as a self-assessment tool

Regions assessing their
capacity for adoption of
good practices

Step 4
Self-assessment
of European
regions

Outcomes of step 4: Maturity of regions for
adoption of selected good practices

Step 3
Refinement of
B3- MM

Outcomes of step 3: B3-MM validated as multidimensional
benchmark of good practices

Progress to date

Step 2
Maturity
assessment

Outcomes of step 2: B3-MM used to identify maturity
requirements in the selected good practices

Step 1
Dephi study

Outcomes of step 1: Validated B3-MM

cirocco
Scaling Integrated Care in Context

Expected outcomes

A tool, the Maturity Model for Integrated Care

► **To assess**

- The **maturity requirements** of a particular good practice

- The **readiness** of a health and care system

  ‣ **to scale-up** a good practice

  ‣ **to transpose** a good practice developed in another region or country

► **To support a twinning and coaching** methodology

Thank you
