MATURITY REQUIREMENTS OF GOOD PRACTICES

Jon Txarramendieta
Kronikgune – Research centre on Chronicity
Objective: Assess the context where the practice has been implemented by obtaining its maturity requirements.
Step 01
Definition of GGPP for Scirocco

Step 02
Criteria for the selection of GGPPs and viability assessment

Step 03
Data collection
Ad-hoc template
34 GGPPs

Step 04
Viability assessment
6 criteria
Prioritize 15 GGPPs

Step 05
Maturity requirements

Step 03

Data collection
Ad-hoc template
34 GGPPs

Step 04

Viability assessment
6 criteria
Prioritize 15 GGPPs

Step 05

Maturity requirements
Scirocco Tool
Viability Assessment Criteria

1. What is the time needed for the practice to be deployed?
2. What is the investment per citizen / service user / patient?
3. What is the evidence behind your practice?
4. What is the maturity of your practice?
5. What is the estimated time of impact of your practice?
6. What is the level of transferability of your practice?
Step 01
Definition of GGPP for Scirocco

Step 02
Criteria for the selection of GGPPs and viability assessment

Step 03
Data collection:
- Ad-hoc template
- 34 GGPPs

Step 04
Viability assessment:
- 6 criteria
- Prioritize 15 GGPPs

Step 05
Maturity requirements

Scirocco Tool
* With items adapted from “Practical Guidance for Scaling Up Health Service Innovations” by WHO 2009
Step 01
Definition of GGPP for Scirocco

Step 02
Criteria for the selection of GGPPs and viability assessment

Step 03
Data collection
Ad-hoc template
34 GGPPs

Step 04
Viability assessment
6 criteria
Prioritize 15 GGPPs

Step 05
Maturity requirements
Scirocco Tool
C1. Time needed for the practice to be deployed
C2. Investment per citizen/service user/patient
C3. Evidence behind the practice
C4. Maturity of the practice
C5. Estimated time of impact of the practice
C6. Level of transferability of the practice

Maturity requirements

- SCIROCCO tool
- Analyse the system (context) in which the practice has been implemented
- Completed by the Leader of the Good Practice
Maturity requirements
Conclusions

1. Data collection should be pragmatic: the minimum data to understand them!
2. To transfer or scale up, it is necessary to take into account the system too!
3. Though not all Practices require the same level of maturity in each dimension
THANK YOU!
