

TOOL TO ASSESS READINESS FOR INTEGRATED CARE

Stuart Anderson Cristina Alexandru University of Edinburgh

Co-funded by the Health Programme of the European Union

Scirocco

- Focus on Integrated Care
- Scaling good practices through transfer to other health and care systems.
- Success of a good practice depends on the context (health and care system adopting the practice).
- Scirocco starts from a focus on the maturity of a health and care system to adopt integrated health and care practices.
- From now on:
 - Maturity means "Maturity to adopt integrated health and care practices"
 - Maturity requirement means "A requirement for maturity imposed by a good practice"

Tasks the Tool Should Support

- 1. Rating the **maturity** of a regional/national health service based on the experience of participants in the system.
- 2. Rating the **maturity requirement** of a good practice in integrated care based on the experience of participants in designing and deploying the good practice.
- 3. Rating the **maturity requirement** of a good practice in integrated care based on a written description.
- 4. Supporting twinning between two health systems
- 5. Supporting coaching around a particular practice

Challenges In the Design of the Tool

- The face validity of the tool has been verified.
- Usability is the key aspect so we have linked questionnaires to the tool.
 - □ Language is a key aspect.
 - Understanding the concepts and dimensions
- Evidence evolving the way we support justifying scores.
- Support for negotiation.
- Support for sharing.

EHTEL INNOVATION INITIATIVE

Q1 Q2 Q3 Q4 Q5 Q6 Q7 Q8 Q9 Q10 Q11 Q12

1. Readiness to Change (to enable more integrated care) *

No acknowledgement of compelling need to change
 Compelling need is recognised, but no clear vision or strategic plan
 Dialogue and consensus-building underway; plan being developed
 Vision or plan embedded in policy; leaders and champions emerging
 Leadership, vision and plan clear to the general public; pressure for change

O Political consensus; public support; visible stakeholder engagement

If someone asked you to justify your rating here what would you say (please provide a few short sentences):

How confident are you of your rating?

0

Who do you think could provide a more confident judgement?

Outline Methodology

- Use a multidisciplinary team because the maturity dimensions are heterogeneous and cross many domains of expertise.
- Rate the dimensions independently (or at least come up with an initial perspective).
- Discuss with the team.
- Achieve consensus

A Multidisciplinary Team

The doctor

The nurse

The IT Professional

The Administrator

Discussion/Negotiation

Consensus

Next Steps

- Sharing models across a group owners and viewers – consulting now.
- Medium term:
 - □ Supporting sharing overlaying multiple models...
 - □ More structured way of providing evidence.
 - □ Support for reaching consensus
 - □ Tackling language issues.
- Longer term
 - □ Supporting negotiation over adoption.
 - □ Supporting twinning.

Evaluation

- We have data from use of the tool.
- We have questionnaire data supplied by Scirocco partners and other users.
- Looking at diversity and expertise across the team
 - Looking at the extent to which value systems of respondents are important.
 - □ Looking at expressions of confidence.
- Identifying the use of particular vocabulary in justifications.

Summary

- The initial version of the tool seems stable and usable.
- We are seeing use of the tool inside and outside the project.
- We have the next version of the tool ready to distribute.
- There are considerable challenges in providing effective support for twinning and coaching.
