SCIROCCO Project

EU Health Programme (CHAFEA)

- **EC funding:** €1,322,775
- **Budget:** €2,204,631.21
- **Start:** 1 April 2016
- **Duration:** 32 months
- **Coordination:** NHS 24
- **10 Partners:** NHS 24, UEDIN, VUB, UVEG, Kronikgune, Osakidetza, ARES PUGLII, FNOL, NLL, EHTEL
- **5 Healthcare regions:** Basque Country, Norrbotten, Olomouc, Puglia, Scotland.
SCIROCCO’s Objective

“To facilitate the scaling-up of good practices at local, regional or country level by recognising the maturity requirements of good practices and health systems in order to achieve scaling-up and knowledge transfer among European Member States”
Why SCIROCCO?

- **Challenges of scaling up:**
  - Systematic use of different types of evidence;
  - Understanding the context of scaling-up – features of the intervention need to “fit” into the context appropriately;
  - Identification of transferable elements of good practice/intervention for scaling-up;
  - Flow of appropriate information between adopting and transferring entities

Framework models/tools for scaling up are needed
Framework Models for Scaling Up

- The majority of frameworks explicitly focus on scaling up health action in low and middle income country contexts but not so much on long-term care innovations that have been scaled up in developed healthcare systems;

- The Scaling Up Management Framework (Kohl, R. 2015)
- The WHO Framework (WHO, 2015)
- Framework and key success factors for scaling up global health initiatives (Yamey G. 2015)

EIP on AHA B3 Maturity Model
SCIROCCO builds on the achievements of the European Innovation Partnership on Active and Healthy Ageing

crosscutting, connecting & engaging stakeholders across sectors, from private & public sector

+2 HLY by 2020
Triple win for Europe

Specific Actions
- Improving prescriptions and adherence to treatment
- Better management of health: preventing falls
- Preventing functional decline & frailty
- Integrated care for chronic conditions, including telecare
- ICT solutions for independent living & active ageing
- Age-friendly cities and environments
B3 Maturity (Conceptual) Model

- Innovation Management
- Capacity Building
- Readiness to Change
- Structure & Governance
- Information & eHealth Services
- Standardisation & Simplification
- Finance & Funding
- Removal of Inhibitors
- Population Approach
- Citizen Empowerment
- Evaluation Methods
- Breadth of Ambition
Objectives:

- Integrated care requires, as a foundational capacity, sharing of health information and care plans across diverse care teams that leads progressively to systems for enabling continuous collaboration, measuring and managing outcomes and enabling citizens to take a more active role in their care. This means building on the existing eHealth services, connecting them into new ways to support integration, and augmenting them with new capabilities, such as enhanced security and mobility.
Information & eHealth Services

Assessment:

0 – Information systems are not designed to support integrated care

1 – Information and eHealth services to support integrated care are being piloted

2 – Information and eHealth services to support integrated care are deployed but there is not yet region-wide coverage

3 – Information and eHealth services to support integrated care are available via a region-wider service but use of these services is not mandated

4 – Mandated or funded use of regional/national eHealth infrastructure across the healthcare system

5 – Universal, at-scale regional/national eHealth services used by all integrated care stakeholders
How to Use the B3 Maturity Model?

Step 1: Good Practices viable for scaling up

Step 2: The originating Region is assessing the maturity needs of a particular practice

Step 3: The originating region is assessing the maturity needs of its healthcare system

Step 4: B3 Maturity Model facilitates partnership for scaling up

Step 5: Knowledge transfer/Scaling Up
However,

TESTING & VALIDATION IS NEEDED

SCIROCCO
From Conceptual Model to an Online Self-Assessment Tool for Integrated Care
SCIROCCO’s Strategy to Implement the Project

Step 1: Dephi study
- Outcomes of step 1: Validated B3-MM

Step 2: Maturity assessment
- Outcomes of step 2: B3-MM used to identify maturity requirements in the selected good practices

Step 3: Refinement of B3-MM
- Outcomes of step 3: B3-MM validated as multidimensional benchmark of good practices

Step 4: Self-assessment of European regions
- Outcomes of step 4: Maturity of regions for adoption of selected good practices

Step 5: Further Refinement of B3-MM
- Outcomes of step 5: B3-MM tested in real life settings as a self-assessment tool

Step 6: Knowledge transfer

Step 7: Analysis of experience of scaling-up
- Outcomes of step 7: Lessons learned and policy recommendation

Step 8: Final SCIROCCO tool

Scaling-up

Regions preparing the environment for scaling-up

Regions assessing their capacity for adoption of good practices
