How to accelerate scaling Integrated Care in Europe

Thought Leadership Webinar

18 April 2018, 10:00 - 11:00 CET

EHTEL and EHMA are partnering to raise awareness about management tools and methods which can help implementers to scale-up digital health services and make them an integral part of health and care delivery systems.

The first collaboration on the matter has started in 2012 with the Momentum project and ended-up with the identification of 18 critical success factors and the development of a collaborative assessment methodology.

Today, both organisations are pleased to announce this webinar to their respective members. Over one hour, it will put the spotlights on a new **management tool and associated methodologies**: the SCIROCCO On-Line tool, aiming at assessing the readiness of an environment for Integrated Care.

This collaborative tool is based on the Maturity Model developed by the EIPonAHA Action Group B3 on Integrated Care and takes the form of an on-line questionnaire. The Model has been scientifically validated and already tested in more than 30 regions in Europe.

During this webinar, you will learn about the on-line tool itself, methodologies on how to apply the tool as well as the experience of some of those regions who used the prototype of this tool.

Main messages
- The maturity model can help assessing the readiness of a health and care system for integrated care.
- It can also help identifying domains where further work is needed to support the large-scale deployment of a good practice in integrated care.

Date/time: 18 April 2018, 10:00 – 11:00 CET
Webinar URL: [to be communicated]

Final Agenda

How to accelerate scaling Integrated Care in Europe

Welcome and Introduction to the webinar   **10:00 CET – [10']**
Co-Chair: Usman Khan, EHMA and Marc Lange, EHTEL

Introduction to Maturity Model and SCIROCCO Tool   **10:10 – [10']**
Andrea Pavlickova, NSS National Healthcare Services Scotland

Spotlight on Maturity Dimensions of Integrated Care
Stuart Andersson, University of Edinburgh (School of Informatics) (tbc)   **10:20 – [15']**
- Population Approach (with Q&A)
- Innovation Management (with Q&A)
- Capacity building (with Q&A)

User Experience: creating consensus on the maturity
of integrated health and care systems
Esteban de Manuel Keenoy, Kronikgune, Basque Country (tbc)   **10:35 – [15']**

Question and answers   **10:50 – [10']**

End   **11:00**
