Subject: Comienzo de trabajo en el HUACE, situación ac

Estimadas compañeras.

Aprovechando que estoy de guardia y tras analizar la de email.

En primer lugar quiero agradecer el esfuerzo de cambio en el HUACE, algo totalmente nuevo para todos.

También me gustaría transmitir que tras citación a huec vistas o citadas todas las solicitudes (teníamos 237 vola 2014). Se comenzó por los 47 Preferentes y se continuó Ordinario. Espero que con esto lleguen menos solicitud llegaban a ritmo de uno semanal +ó-). pendientes de cita sucesiva. Por favor Ana, mándaselos a Loli Pereiro para que los vayan citando, como ha hecho hasta ahora con los anteriores.

March 2014. They had a serious problem. More than 230 patients to be attended as first consultations and no time or place to serve them.

o que debe estar claro que las agendas previsto, evitando cambios de ningún 1 siempre. Si tras la distribución de segunda consulta (y esto solo lo drá citar sobre la agenda de Santiago 2,

r algo ajeno al servicio de Anestesia, y nes de trabajo. Debe quedar claro que a de consulta disponible (una consulta e la Unidad del Dolor estamos de estros puestos de trabajo. Es decir, que ubren las guardias o URPAS o tardes el punto.

e también se deben respetar sin

modificar. Si nos vamos de vacaciones o de congreso, ó si estamos entrantes o salientes de ardia, también nos cubrimos entre nosotros. Por lo tanto el quirófano que coincide con el ngreso de Toledo lo asumiremos los que estamos ese jueves, en lugar de hacer cambios. Así pierde ese quirófano y no cambiamos agendas. Por lo tanto no es necesario hacer ningún

Por meses, empezamos a ver pacientes **remitidos en Marzo de 2013** y en este mes nos hemos colocado en Septiembre de 2013, quedándonos por atender (repito que ya están citados) unos 95 pacientes de 2013. No hay demora de Preferentes (hay huecos libres cada semana), y han

llegado unos 28 pacientes en 2014 de priorida

La citación de CNP desde Primaria va según le están todos citados.

Están bloqueadas todas las consultas de HUA( hasta conocer la disponibilidad tanto del pers Dolor. Cuando sepamos si podemos abrir esas citados en esas tres semanas y adelantar algú

Desde febrero de 2014, tenemos las agendas

Estas dos últimas son iguales y aprovecho par mejorando la demora, sobretodo de sucesivas antiguo que os pido que no volváis a utilizar. I las 9h y en esa hora hay que estar en la sesiór consultas en la misma agenda, empezando a l pendientes de cita sucesiva deben ser enviado establecido y no otro. Cada día queda un hue inesperados.

So they agreed to change the management model.

estés libre de carga de e lo dices) para quedar con to antes, por favor, porque el HUACE (llega a poner 25 ó o días puedes mejor.

Es prioritario que antes de Semana Santa tengamos citados a TODOS los pacientes

**For patients:** there are patients with reduced mobility, with intense work schedules, bad weather...

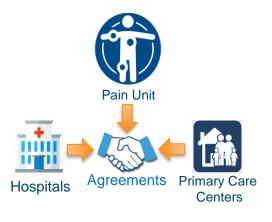

#### Integrated Approach to Pain Management

Improve patients pain management, coordinating the conventional care with various forms of non f2f services

#### **Change Pain Management Model**

#### **Integrated care approach**

- Joint management Primary Care & Pain Unit
- Stratification
- Non face-to-face care
  - Teleconsultations and real-time sharing of patient information
    - · Primary Care, hospitals and the pain unit
  - · Personal health folder
- Personalised Management Plan
- Electronic prescription

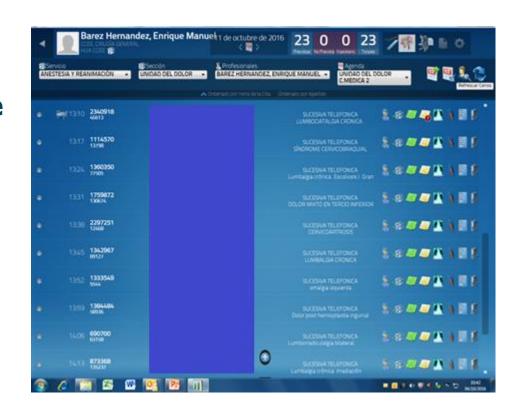

## 1. Scheduled telephone consultations

Accounting for 1/3 of the follow-up to the Pain Clinic of OSI Araba. Both by doctors and by nurses.

They have reduced visits and unexpected calls by 78%.

# 2. Remote control of known patients

To control the evolution (diagnostic tests, income, emergency ...). We get in touch with patients if there is a reason.

## 3. Videoconferencing

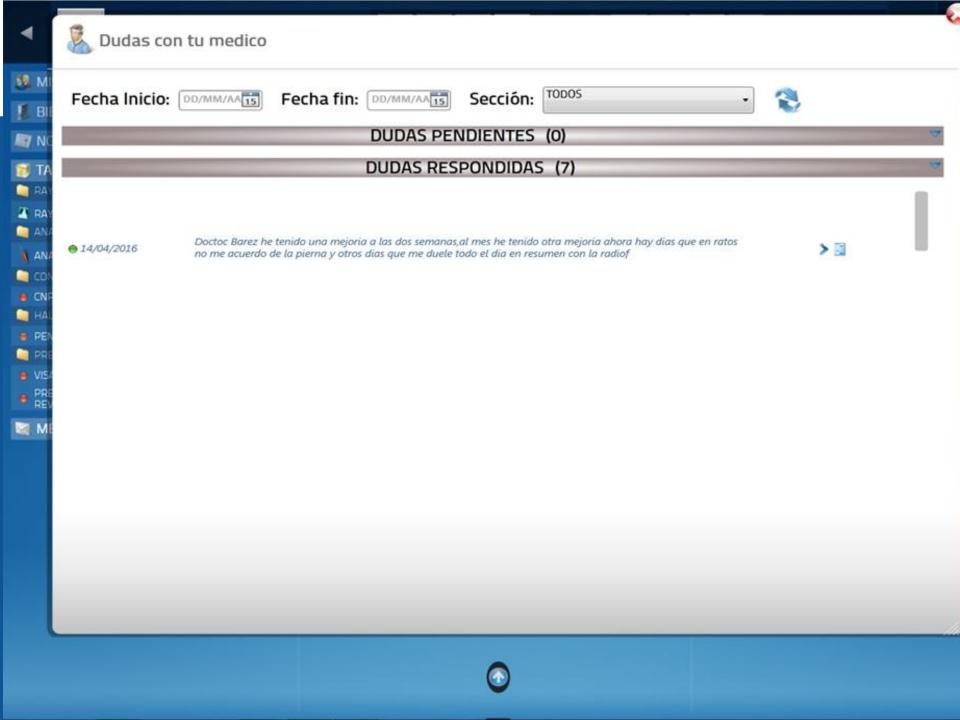

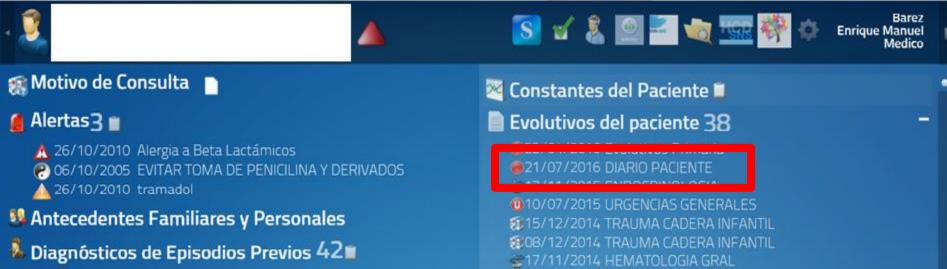

# 4. Consultations through the Health Folder (For asking questions, giving recommendations or writing a pain diary...)

- Tratamiento habitual.20 +
  - Evolución (Anamnesis-Exploración física)

Barez Hernandez, Enrique Manuel 19/09/2016 12:03:45 Explico bomba intratecal entiende y acepta. Meto en LE. Doy CI.

- Sin Informe de alta

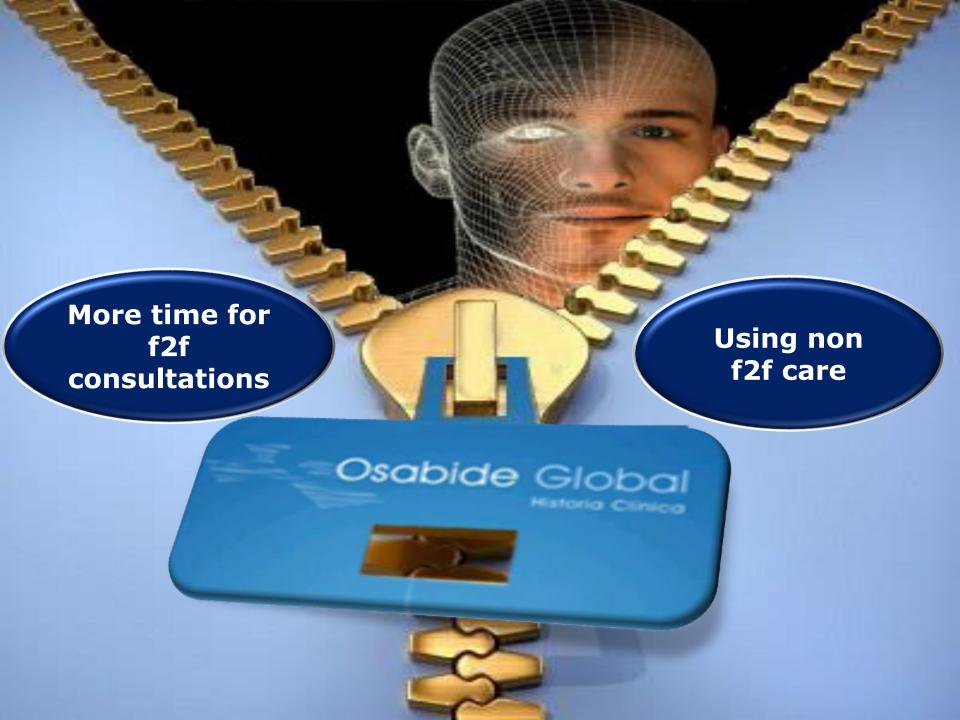

5. mHealth: prescribing pain-related apps for smartphones and tablets, to improve their quality of life.

# Challenge Addressed by the Good Practice

Improve the sat

Decrease the do

**Avoid unnecess** 

**Enhance trainir** 

Improve the sat

The waiting times for first ordinary and regular consultations has gone down from more than 100 days in 2011 to 11 days in 2014 17 days in 2015 and 16 days in 2016 Two days for priority patients.

#### **Assessment Process**

- 1. Select a Good Practice viable to be transferred
  - 2. Identify the two sub-groups
  - 4 people. 2 from the context, 2 from the practice
    - 3. Introductory meeting

Meeting to introduce the project and the SCIROCCO Tool

4. Individual self-assessment surveys (4)

Using the current online version of the SCIROCCO Tool

5. Workshop

Consensus scores & features and discussion

#### **Individual Self-assessment Surveys**

Personal Health folder's manager

Director of integration of the ICO

Managerial

Head of the Anaesthesiology Department

Head of the Pain Unit

#### **Assessment Process**

- Select a Good Practice viable to be transferred
  - Identify the two sub-groups
  - 4 people. 2 from the context, 2 from the practice
    - 3. Introductory meeting

Meeting to introduce the project and the Scirocco Tool

4. Individual self-assessment surveys (4)
Using the current online version of the Scirocco Too

5. Workshop

Consensus scores & features and discussion

## Workshop

#### Managerial

Director of integration of the ICO

#### Practitioner

Head of the Anaesthesiology
Department

Head of the Pain Unit

#### Implementation & Transferability – Most relevant

- The use of a fully integrated EHR that is accessible to all professionals.
- The use of tele-consultations between primary care and the hospital.
- The use of a Personal health folder, accessible for the entire population, which allows.
   intercommunication between them and the health professionals.
- Have cohesive structures between primary and specialized care and common communication channels and tools.
- It would be desirable to have integrated the social sector.
- The Personal health folder is used as a tool for patient empowerment. Using it, patients can interact with the clinicians. This procedure replaces some face-to-face consultations.

#### Implementation & Transferability - Not as relevant

- Some functional integration between health care levels.
- To have working groups, with certain order and leadership.
- Have some funding to plan and implement the intervention.
- Screening request and appointments prioritisation according to the patient's morbidity risk.

## **Key findings and Conclusions**

- The consensus workshop has been key to achieve the results
- The features can reduce the variability
- The language used in the tool is somewhat complicated for front line professionals. A further refinement could be beneficial

"I would love to know not only the degree of transferability, but the level of effective transfer achieved between regions...

I imagine it will take a few years, I will wait... let me know"

## THANK You!
