TOOLS AND METHODOLOGIES TO ASSESS
INTEGRATED CARE IN EUROPE

Report by the Expert Group on Health Systems
Performance Assessment

Why SCIROCCO?

European Commission > EIP on AHA > Action Groups > B3

Home About the partnership Action Groups Reference Sites I2M Blueprint MAFEIP Library News Events

A1 Adherence to prescription
A2 Falls prevention
A3 Lifespan Health Promotion [...]
B3 Integrated care
Key documents
Documents of meetings
Achievements
C2 Independent living solutions
D4 Age friendly environments

Action Group B3
Replicating and tutoring integrated care for chronic diseases
The Action Group on integrated care is a unique partnership involving around 120 multi-stakeholder committees, including national governments, local authorities, and healthcare providers.

Challenges of Scaling-up

How to use existing evidence?

What elements of Good Practice are transferable?

What is my local environment like?

Is my environment ready to adopt a Good practice?

What information do I need to enable the adoption of Good Practice?

How to create local conditions for the adoption of Good Practice?

Why SCIROCCO?

Lack of tools / frameworks that can help us to understand how to move towards more sustainable health and care systems; how to support implementation, scalability and transferability of integrated care solutions in Europe.

SCIROCCO Tool for Integrated Care

European Innovation
Partnership on Active
and Healthy Ageing

Objectives of SCIROCCO

From B3 Maturity Model to SCIROCCO Tool

European Innovation
Partnership on Active
and Healthy Ageing

SCIROCCO
Self-assessment tool
 with an objective to
 assess
 maturity/readiness for
 the adoption of
 integrated care and
 facilitate knowledge
 transfer and learning.

SCIROCCO self-assessment tool is an online tool

New Maturity Model Questionnaire

Please reply to all of the questions

Q1 Q2 Q3 Q4 Q5 Q6 Q7 Q8 Q9 Q10 Q11 Q12

2. Structure & Governance * Required

- ☐ Fragmented structure and governance in place
- ☐ Recognition of the need for structural and governance
- ☐ Formation of task forces, alliances and other information
- ☐ Governance established at a regional or national level
- ☐ Roadmap for a change programme defined and agreed
- ☐ Full, integrated programme established, with full governance

If someone asked you to justify your rating here write in short sentences):

How confident are you of your rating?

Who do you think could provide a more confident judgement?

Q2. Structure and Governance: Objectives

The broad set of changes needed to deliver integrated care at a regional or national level presents a significant challenge. It needs multi-year programmes with excellent change management, funding and communications, and the power to influence and (sometimes) mandate new working practices. This means alignment of purpose across diverse organisations and professions, and the willingness to collaborate and put the interest of the overall care system above individual incentives. It also means managing the introduction of eHealth services to enable integrated care in a way that makes them easy to use, reliable, secure, and acceptable to care professionals and citizens alike.

- Enabling properly funded programmes, including a strong programme, project management and change management; establishing ICT or eHealth competence centres to support roll-out; distributed leadership, to reduce dependency on a single heroic leader; excellent communication of goals, progress and successes.
- Managing successful eHealth innovation within a properly funded, multi-year transformation programme.
- Establishing organisations with the mandate to select, develop and deliver eHealth services.

SCIROCCO tool addresses the challenges of adoption and scaling up of integrated care by:

1. Assessing:

- Maturity requirements of the Good Practice in order to understand transferable elements of the Good Practice/intervention for the adoption and scaling-up.
- Maturity of healthcare system for the adoption of integrated care solutions in order to understand the local context/conditions enabled the implementation of integrated care.

Final Spider Diagram after the Consensus workshop

Strengths:

Structure & Governance
Finance & Funding
Capacity Building

Weaknesses:

Citizen empowerment
Information & eHealth services
Population approach

These results are not surprising but in line with other evaluations. The region has invested heavily in governance and financial terms. The next step will be to develop a capillary service across the entire regional territory.

SCIROCCO tool addresses the challenges of adoption and scaling up of integrated care by:

2. Facilitating

- Better understanding of the **strengths and weaknesses** and **areas of improvement** in the local healthcare systems in order to adopt integrated care.
- **Multi-stakeholder discussions** and consensus-building.
- Knowledge transfer and **effective learning** through the **systematic flow of appropriate information** and evidence between the adopting and transferring entities.

Maturity Requirements of Advance care planning
