What is the ambition of SCIROCCO Tool?

To address the challenges of adoption and scaling up of integrated care by:

1. Assessing
   - Maturity requirements of the Good Practice in order to understand transferable elements of the Good Practice/intervention for the adoption and scaling-up.
   - Maturity of healthcare system for the adoption of integrated care solutions in order to understand the local context/conditions enabled the implementation of integrated care.
What is the ambition of SCIROCCO Tool?

To address the challenges of adoption and scaling up of integrated care by:

2. Facilitating

- Better understanding of the strengths and weaknesses and areas of improvement in the local healthcare systems in order to adopt integrated care.
- Multi-stakeholder discussions and consensus-building.
- Knowledge transfer and effective learning through the systematic flow of appropriate information and evidence between the between adopting and transferring entities.
SCIROCCO
Self-assessment tool with an objective to capture the multi-stakeholder perspective and experience with the implementation of integrated care
SCIROCCO self-assessment tool is an online tool.

New Maturity Model Questionnaire

Please reply to all of the questions

Q1 Q2 Q3 Q4 Q5 Q6 Q7 Q8 Q9 Q10 Q11 Q12

2. Structure & Governance * Required

- Fragmented structure and governance in place
- Recognition of the need for structural and governance
- Formation of task forces, alliances and other inter
- Governance established at a regional or national
- Roadmap for a change programme defined and
- Full, integrated programme established, with full

If someone asked you to justify your rating here with short sentences:

How confident are you of your rating?

Who do you think could provide a more confident judgement?

Q2. Structure and Governance: Objectives

The broad set of changes needed to deliver integrated care at a regional or national level presents a significant challenge. It needs multi-year programmes with excellent change management, funding and communications, and the power to influence and (sometimes) mandate new working practices. This means alignment of purpose across diverse organisations and professions, and the willingness to collaborate and put the interest of the overall care system above individual incentives. It also means managing the introduction of eHealth services to enable integrated care in a way that makes them easy to use, reliable, secure, and acceptable to care professionals and citizens alike.

- Enabling properly funded programmes, including a strong programme, project management and change management; establishing ICT or eHealth competence centres to support roll-out; distributed leadership, to reduce dependency on a single heroic leader; excellent communication of goals, progress and successes.
- Managing successful eHealth innovation within a properly funded, multi-year transformation programme.
- Establishing organisations with the mandate to select, develop and deliver eHealth services.

Your questionnaire was successfully saved

Q1  Q2  Q3  Q4  Q5  Q6  Q7  Q8  Q9  Q10  Q11  Q12

1. Readiness to Change (to enable more integrated care) *

- No acknowledgement of compelling need to change
- Compelling need is recognised, but no clear vision or strategic plan
- Dialogue and consensus-building underway; plan being developed
- Vision or plan embedded in policy; leaders and champions emerging
- Leadership, vision and plan clear to the general public; pressure for change
- Political consensus; public support; visible stakeholder engagement

If someone asked you to justify your rating here what would you say (please provide a few short sentences):

There are policy documents in place, the minister is prepared to speak on this matter. However the organisations who will implement have not fully adopted the approach and it is patchily represented in their plans.

How confident are you of your rating?

Moderately confident

Who do you think could provide a more confident judgement?

XXX who leads on Change  Mar

Pain Clinic Good Practice in the Basque Country

Managerial

Personal Health folder’s manager

Director of integration of the ICO

Practitioner

Head of the Anaesthesiology Department

Head of the Pain Unit
Consensus-building workshop

System team
- Personal Health folder’s manager
- Director of integration of the ICO

Practice team
- Head of the Anaesthesiology Department
- Head of the Pain Unit
The key requirements for the implementation & transferability of Pain Clinic

Good Practice in the Basque Country identified by SCIROCCO Tool

- The use of a fully integrated EHR that is accessible to all professionals
- The use of tele-consultations between primary care and the hospital
- The use of a Personal health folder, accessible for the entire population, which allows intercommunication between them and the health professionals

- Have cohesive structures between primary and specialized care and common communication channels and tools.
  - It would be desirable to have integrated the social sector.

- The Personal health folder is used as a tool for patient empowerment. Using it, patients can interact with the clinicians. This procedure replaces some face-to-face consultations
Implementation & transferability - Not as relevant

- Some functional integration between health care levels
- To have working groups, with certain order and leadership

- Have some funding to plan and implement the intervention

- Screening request and appointments prioritisation according to the patient’s morbidity risk

Maturity of Norrbotten’s healthcare system for integrated care

No common/systematic approach. Fragmented evaluations when services are implemented.

No specific model used for projects or scaling up where you can find support to overcome known inhibitors. Different models have been used with different results.

Everyone has access to their own EHR, lab-results, open comparisons, quality registers, specific national registers. Person-centered approach, strategy and action plan for citizen involvement.

We do have a somewhat fully integrated health and social care service with collaboration on all three levels but there are still parts that can be improved.
